- ✓ Order Code : VRD1890

Join 2 panels together with a  
Connector Kit  
Order Code : VRD1890C

Any number of panels can  
be linked together.

## Privacy Panel

Panels can be pivoted to form  
intimate meeting areas ... or  
a large scale division of a  
meeting room

## Why are they different ?

Most partitions don't have wheels.  
Most partitions don't link together.  
Most partitions are not really pinnable .. and most partitions  
don't have a whiteboard.  
So clearly .. ours are unlike most partitions.

Our Communicate Room Dividers really do offer you a  
*clever meeting and privacy solution* .. wherever  
you care to use them.

### Featuring ...

- ✓ One size : 1800 x 900mm .. quality magnetic whiteboard one side
- ✓ And pinnable charcoal colour fabric the other side ... hides pin holes !
- ✓ High density 'HardSoft'® pinnable background. Provides extra strong grip.
- ✓ Smooth rolling, large lockable castors
- ✓ Graphite aluminium frame enhances all environments
- ✓ Panels can be linked together with connector (optional)

- This is how a single Communicate Room Divider looks.
- One side whiteboard .. the other, a charcoal pinnable fabric
- It features a charcoal grey aluminium frame
- Large and durable locking wheels that are a breeze over any surface
- Flipchart hooks included
- Magnetic pen shelf provide
- **Order Code : VRM1890**

## What are they ?

Double sided partitions that measure 1800x900mm. One side is magnetic whiteboard. The other a charcoal pinnable fabric. They can be linked together with a connector to ensure maximum flexibility. They can be turned at right angles or connected in a straight line. Each panel is supplied with 2 Flipchart paper clips to hold meeting notes and a magnetic pen shelf. You can connect as many partitions together as you need to partition rooms into 2 ... to make U shaped cubicles , to make a zig zag pattern .. you name it !

## How are they different to most partitions ?

Most partitions don't have wheels. Most partitions do not link together. Most partitions are not really pinnable .. and most partitions dont have a whiteboard. So really .. they're unlike most ordinary partitions. Our Communicate Room Dividers really do offer you a clever solution .. wherever you care to use them.

## Why should I use them ?

- Room Dividers create more efficient use of open plan space
- They provide a quieter, more focused meeting space in large areas
- They provide a quick space for small meetings in sometimes large chaotic open areas
- Because of their flexibility they allow meetings or even recreational space to be constructed in minutes !
- Large rooms can be subdivided to ensure efficient and collaborative meetings
- Ideal for setting up smaller 'break-out' brainstorming groups
- They can be de-constructed and stored in a 'concertina' shape awaiting the next use
- In classrooms they add character by being used with bright posters and drawings ...
- So that large areas are less intimidating to young children
- Teachers reading stories just became better... with less distractions
- Room Dividers can quickly hide ugly or 'no go' areas .. from kitchenettes to photocopiers or even toilets
- In advanced education .. smaller 'one on one' meetings can be 'conjured' from large areas in moments
- Simply wheel the Room Dividers into position .. and move them into the shape that's suitable
- After the class or meeting .. simply roll them back into storage .. or change their shape

## Anything else ?

Well .. did we say that the whiteboard comes with a 8 year warranty ? Or that the pinnable side features a charcoal fabric that 'hides' the pinholes ?

**Start communicating. Improve work spaces. Increase your efficiencies .**
