

Krommenie Pinboards

Krommenie is a 6mm thick rubberised cork surface .. which offers extraordinary durability. Often with many reported uses over 25 years or more ...

A feature of the pin surface is the ability for the pinholes to be 'self healing'. The holes actually close up when the pin is removed. And the colour of the material is all the way through the material .. so if it is even torn or chipped the colour's integrity remains in place.

Available in 12 dynamic colours to suit most applications !

Ideal for all hard wearing areas including .. schools, hospitals, universities ...

SIZE	CODE
900 x 600mm	KR0425
900 x 900	KR0428
